

Our Living Lands from Native Voice One

Radio Series on Climate Change Impacts and Solutions

OUR LIVING LANDS

Our Living Lands is a five-minute, weekly segment that explores impact of climate change on Indigenous communities' health, culture, and environment. Every week you'll hear about unique challenges and innovative solutions from Alaska to Florida.

Our Living Lands aims to highlight the wide-ranging impact of climate change - and to share potential solutions for addressing these problems. It has a hopeful tone. [LISTEN](#)

Most segments will be anchored by a full-length reported feature. The weekly five-minute episode can run and repeat any time during the week. For public radio stations, they would work in news magazines at the top of the hour or in the D segment.

The *Our Living Lands* team includes host **Antonia Gonzales** (Navajo), editor **Joseph Lee** (Aquinnah Wampanoag), and reporter/producer **Daniel Spaulding** (Nimiipúu). Mountain West News Bureau Managing Editor **Michael de Yoanna** oversees the program. Theme music by **Delbert Anderson** (Navajo).

Our Living Lands is a collaboration of the [Mountain West News Bureau](#), [Koahnic Broadcast Corporation](#), and [Native Public Media](#).

Available through NV1 via the PRSS ContentDepot and FTP. Program fees based on station tier level and fee cap. Contact NV1 to request *Our Living Lands*:
